Das Auto.

Volkswagen Passat CC

The Volkswagen Philosophy.

Innovation. Responsibility. Value. At Volkswagen we pride ourselves on this set of beliefs. So when you make the Volkswagen choice you can be assured that you have chosen a car with this creed at the very core of its inception, its development, and its realisation.

At Volkswagen we have combined the power of innovation with exceptional design to deliver a superior driving experience. Superb technologies such as our new low emission TSI petrol and TDI diesel engines not only offer an enhanced driving experience, but significantly reduce both carbon emissions and fuel consumption.

Responsible, efficient environmental considerations such as this not only save you money, but ultimately the planet's precious resources, and is just one example of the many commitments that Volkswagen has made to reduce its carbon footprint.

We are proud of the reputation we have earned for value. A Volkswagen vehicle offers safety, reliability and comfort, making it outstanding value for money. With trusted and timeless German engineering our models are the perfect vehicles for you and your family.

WOB B 8207

Passat CC.

The Passat CC combines the comfort, appearance and practical functionality of a four door sedan with the sleek exclusivity and emotional appeal of a coupé. The Passat CC looks unmistakably dynamic and elegant thanks to its flowing lines and classic coupé silhouette. For these reasons, it is Volkswagen's Comfort Coupé.

The Passat CC is ideal for discerning drivers who demand premium levels of sophistication and innovation. This charismatic vehicle combines both performance prowess and impressive pragmatism. With an eloquent temperament lurking beneath its distinctive bonnet contours, the Passat CC exudes luxurious intelligence through a synthesis of performance, innovative technology and streamlined finesse.

C 9782

Design.

The Passat CC is streamlined, subtle and supreme. Combining the functionality of a four-door sedan with the sporty profile of a coupe, this car is truly athletic: with agility, practicality and refined sophistication. A perfect fusion of form and function.

Beneath the window line, a muscular shoulder line forms a style-defining design element. The frameless front and rear power windows fade neatly into the body; door and side panels follow the sculptured lines in uniform fluidity, accentuating its sporty athleticism. The rear of the vehicle is characterised by large tail lights that produce an unmistakable visual image. The fluid lines of the boot region extend into the rear window, as if drawn with a single line.

New Technology.

Volkswagen's constant aspiration for excellence means that affordable innovative technology is at your fingertips in any model within our product range. With technical expertise and the power of innovation, Volkswagen brings moving ideas to the road. Whether you're driving the petrol V6 FSI or turbo diesel 125TDI, the Passat CC delivers an enthralling drive.

FSI Technology

With FSI technology, fuel is injected directly into the engine's combustion chamber, and not into the intake manifold as with conventional petrol engines. A precise amount of fuel is injected at finely timed intervals to achieve optimal and efficient combustion. FSI technology enables better performance through high power and torque yield, whilst simultaneously maintaining reduced consumption and emissions.

TDI Technology

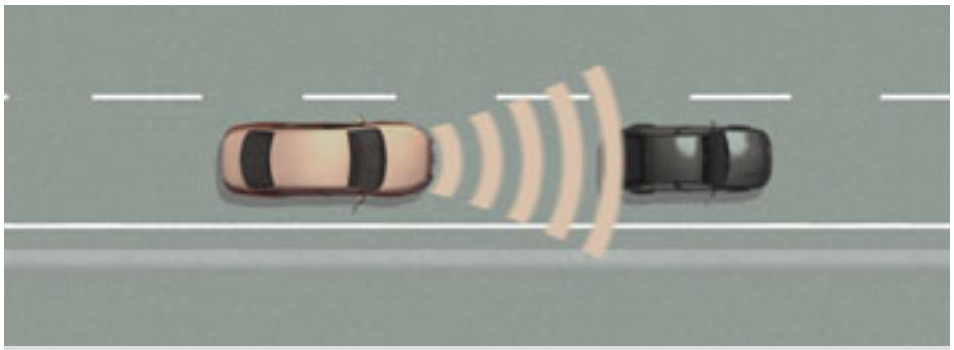
Volkswagen's cutting-edge TDI engines with Diesel Particulate Filters feature Common Rail technology – injecting precise amounts of fuel at exceedingly high pressure. The result is a cleaner burning engine with exceptional fuel economy, impressive torque and compelling performance.

6-Speed Direct Shift Gearbox (DSG)

6-speed DSG is an advanced 6-speed gearbox in which the clutch and gearshift are controlled electronically. What makes DSG unique is that the next gear is already pre-selected and awaiting power to be transferred, resulting in a gear change that takes only 3-4 hundredths of a second. The benefits are virtually no interruption to power, traction or acceleration, and additional flexibility. Furthermore, because it ensures optimum transmission of the engine power, DSG provides excellent fuel consumption and driving satisfaction.

Lane Assist ○

Lane Assist is Volkswagen's active lane keeping assistance system. If you accidentally drift out of your lane, the system instantly reacts by taking corrective action, steering the vehicle back on course. A camera built into the inside rear view mirror detects the road lane markings. If the vehicle drifts out of its lane, the Lane Assist system takes corrective action. If the maximum action available is not enough to stay in lane or if the speed falls below 65km/h, Lane Assist warns the driver with a vibration of the steering wheel.



Adaptive Cruise Control (ACC) with Front Assist ○

When approaching a slower moving vehicle, the optional Adaptive Cruise Control (ACC) brakes your car to the same speed as the vehicle in front, maintaining the pre-selected distance. When a vehicle pulls into your lane in front of you or slows down, your vehicle is automatically decelerated to maintain the pre-selected distance. If your vehicle isn't decelerated sufficiently, and if the traffic situation requires, it is braked to a standstill. Alternatively, if the vehicle ahead moves out of your lane, the Passat CC then accelerates up to the preset desired speed. This provides increased convenience in slow moving traffic.

Front Assist uses a radar sensor to detect when your distance to the car in front becomes critical. It helps to shorten the braking distance, reducing the risk of a rear-end collision. Front Assist warns of a dangerous situation via a visual instrument panel warning plus an alert sound. At the same time the Brake Assist system switches to 'increased sensitivity'. Incase you don't react, Brake Assist activates a brief braking jolt to draw your attention to the risk of a collision.

○ Optional extras.

RNS510 Satellite Navigation System ○

The RNS510 system has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. This unique system calculates your travel route with incredible speed. It also features sophisticated voice recognition technology for increased convenience. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an AUX-IN multimedia socket or an MP3 compatible SD memory card slot.

Media Device Interface (MDI)

This sophisticated new interface facilitates connection to USB audio devices, data storage devices and Apple iPod®*. The MDI allows audio files to be operated via the in-dash audio system without the need to input controls via the media device itself. The MDI system also provides a charging function.

* iPod® is a registered trademark of Apple Inc.

Optical Parking System (OPS)

The Optical Parking System takes the parking aid/parking sensor concept to a new level. A silhouette of the vehicle is displayed on the radio or navigation system screen during parking, showing the vehicle's position and distance from obstacles. Any obstacle within range of the ultrasonic sensors is shown on screen.

Auto Hold Function

As soon as the Passat CC comes to a complete stop, the ABS hydraulic unit retains its final braking pressure. So even when you take your foot off the brake pedal, the brakes remain applied to all four wheels, providing increased comfort in stationary traffic. When you drive off again, a touch on the accelerator automatically releases this function, and your journey continues.

Bluetooth Phone Connectivity

Volkswagen's Bluetooth Phone Connectivity allows you to make hands free phone calls to stay connected with your friends while your hands stay connected to the wheel. Bluetooth Audio Streaming enables you to play music directly from your phone without cables. The system can be operated via the Multi-function Display (MFD Plus) and when equipped, RCD510 or RNS510 touch screens. The system also displays your personalised phone book.

Adaptive Chassis Control

Adaptive chassis control electronically adjusts the damper characteristics for each wheel, ensuring optimum driving comfort for any road surface or driving situation. It achieves the optimum balance between driving comfort and driving dynamics. Adaptive chassis control uses sensors to determine wheel positions, speeds and chassis motion, then adjusts the damping for individual wheels. It analyses signals from the steering, brake and driver assistance systems.

Park Assist 2 ○

Park Assist 2 makes parking problems a thing of the past. It's a system that uses sensors mounted on the front, rear and sides of the vehicle to automatically let you know if a parking space is the right fit. Ideal for both parallel parking and 90 degree parking (like those in shopping centres). All you do is control the speed, and the car steers and manoeuvres for a perfect park every time.

BLUEMOTION TECHNOLOGIES

BlueMotion Technology

Greater efficiency. Lower pollution. And unlimited driving pleasure. BlueMotion Technology is the name we've given to a whole range of innovations and intelligent technologies engineered specifically for our cars – to make them powerful, fun to drive, fuel efficient and environmentally-friendly, all at the same time. Look for the BlueMotion brand mark, and take comfort that you're driving one of the cleanest, most energy-efficient vehicles in our range.

Start/Stop system

With the 125TDI comes a clever way to reduce emissions, and it's as simple as pressing the brake. Every time you come to a standstill by pressing the brake, the engine automatically turns itself off. Only to re-start again the moment you loosen the brake. Simple. But effective.

Brake energy recuperation

Braking has always created energy, but up till now it's been energy wasted. Now, thanks to the brake energy recuperation in the Passat CC range you can capture that energy and convert it into electrical charge every time your foot squeezes the pedal. This is used to charge the battery and therefore reduce load on the engine.

○ Optional extras.

Safety.

Safety is of the highest priority to Volkswagen and is therefore an overriding theme in the design and engineering of the Passat CC. With a full suite of active and passive safety systems, you can rest assured that your safety has been thoroughly considered.

The Passat CC's safety credentials include its laser welded rigid body structure which creates a solid passenger cell. Its galvanized steel body panels are designed to crumple in the event of an accident, absorbing the energy of the impact. The Passat CC's 12-year anti-corrosion perforation warranty is further evidence of Volkswagen's commitment to safety.

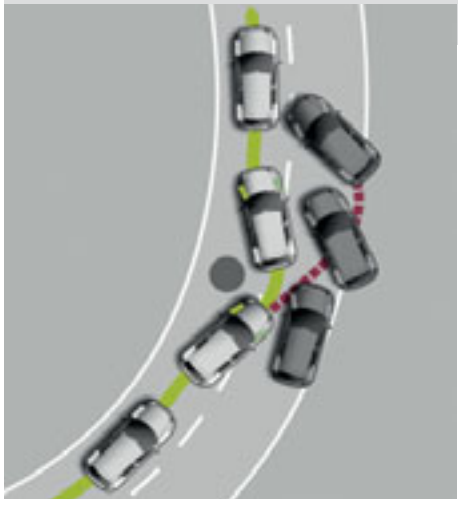
Self Sealing Mobility Tyres

Self Sealing Mobility Tyres ensure a sudden loss of tyre pressure is unlikely, with a highly flexible rubber compound applied to the inside of each tyre to surround foreign objects of up to 5mm in diameter.

Active Safety – Everything designed to help prevent accidents from happening.

Electronic Stabilisation Program (ESP)

ESP helps ensure that the vehicle goes where you steer it, even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with carefully pre-determined values. Should a situation arise in which the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. It also minimises the likelihood of spinning off on a curve due to understeering or oversteering.



Anti Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by intervening in the engine management system and reducing engine torque when necessary.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Electronic Brake-pressure Distribution (EBD)

Every vehicle's centre of gravity shifts forwards when the brakes are applied. This presents a risk of the rear wheels tending to lock up due to the reduction in traction. Electronic Brake-pressure Distribution uses the solenoid valves in the ABS unit to regulate the braking power at the rear wheels, thereby ensuring maximum braking performance at both the front and rear wheels and preventing the rear end from swerving out due to over-braking in the rear wheels.

Electro-Mechanical Power Steering

The Electro-Mechanical Power Steering is a speed-sensitive electrical power-assisted steering system that doesn't require any hydraulic components. Compared to hydraulic power steering, vehicles fitted with Electro-Mechanical Power Steering benefit from lower fuel consumption and new convenience and safety functions.

Passive Safety – Design measures taken to protect the occupants of vehicles from injury, or to reduce the risk of injury.

Safety Optimised Head Restraints

Safety Optimised Head Restraints on the front seats are optimally positioned and specially contoured to help reduce whiplash injuries. In the event of an accident, excellent protection is achieved via the seatback controlling upper body movements, and this is balanced with head movements being controlled via the head restraints.

Crumple Zones

Front and rear crumple zones absorb the energy of an impact and divert the resulting forces away from the secure passenger safety cell.

Airbags

All Passat CC models feature eight airbags – driver and passenger front and side airbags, rear seat passenger side airbags and full length curtain airbags, to help protect both front and rear passengers in a side impact.

Front and Rear Parking Sensors with Optical Parking System

The Passat CC offers front and rear parking sensors with Optical Parking System to assist parking. With this technology at hand, reverse parking has never been so easy.

Seatbelts

Four passenger seatbelts are equipped with belt pre-tensioners. Belt tensioners tighten the seatbelt on impact, pulling it closer to the occupant's body, ideally positioning them for airbag inflation. Belt force limiters reduce front seat belt forces and, in conjunction with belt tensioners and airbags, lessen the risk of upper body injuries. Three-point seatbelts are fitted to all seats, and child seat anchor points are fitted in the rear.

Interior.

If the outside of the Passat CC is inspiring, the inside is amazing. As soon as you sit inside you're aware of the reassuringly solid build. Superb materials and ergonomic design create ultimate comfort and refinement, with everything intuitively placed for your convenience.

Soft Nappa leather appointed seating cushions the front and rear seats for maximum comfort, and with each individually heated you can leave the cold behind. Breathe easy in the comfort of the dual zone climate control air-conditioning with two rear outlets for back seat passengers.

Driver and front seat passenger enjoy the comfort of luxury sports seats in the Passat CC. Sink into the gentle cradle of 12-way electric adjustable seats. Cast your eyes over the brushed aluminium surfaces, white illumination and fine instrument surrounds on the Passat CC's dashboard.

RNS510 Satellite Navigation, Dynaudio, Park Assist, rear window sunblind and decorative wood trim shown are optional extras.

The Passat CC Range.

Volkswagen's FSI direct injection petrol engines or TDI Common Rail turbo diesel engines deliver impressive performance, coupled with a DSG transmission. Whether you're driving the petrol V6 FSI or turbo diesel 125TDI, the Passat CC delivers an enthralling drive. Each model benefits from active safety systems such as Electronic Stabilisation Program (ESP) and Anti-lock Braking System (ABS) with Brake Assist. Passive safety is also covered with eight airbags and front safety optimised head restraints as standard.

Innovative technology is at your fingertips via parking distance sensors front and rear with Optical Parking System, Adaptive Chassis Control, Bluetooth Phone Connectivity, or the Media Device Interface (MDI). Dual zone climate control air conditioning and the electro-mechanical parking brake and Auto Hold function are amongst other impressive standard features. Each Passat CC model comes standard with alloy wheels, turn indicators integrated into the door mirrors and new anti-theft wheel bolts have been designed to provide protection against theft.

125TDI. Outstanding prestige and comfort that delivers compelling performance with impressive efficiency.

The 125TDI makes a statement with standard features including 12-way electrically adjustable sports luxury front seats with memory for the driver, cruise control and sports suspension. 18" Daytona alloy wheels are standard. The 125TDI engine is a powerful, efficient and clean burning 2.0L engine that produces 125kW of power and a significant 350Nm of torque. This engine, featuring Common Rail technology, already meets forthcoming stringent Euro V emissions standards and boasts smoother and quieter operation, while the Diesel Particulate Filter produces cleaner emissions. It features a 6-speed Direct Shift Gearbox (DSG) as standard. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and eight airbags.

Stylish 18" Daytona alloy wheels are standard for the 125TDI.

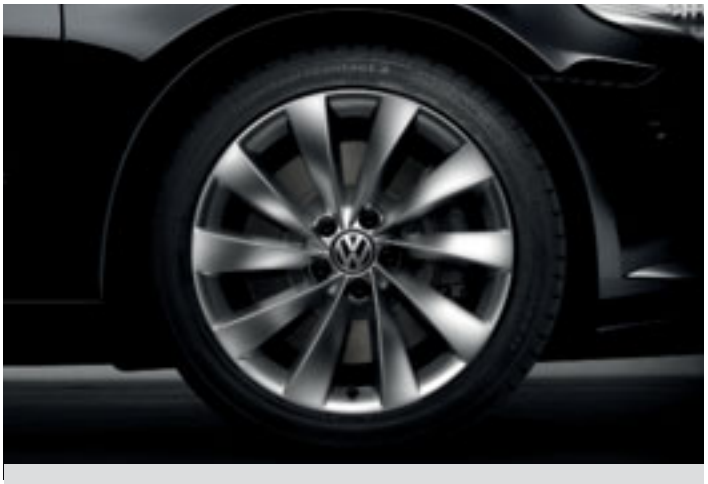
WOB H 7091

V6 FSI. Luxurious finesse and sporty performance combined with uncompromising power.

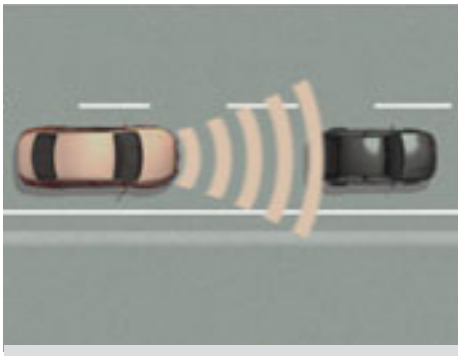
The Passat CC V6 FSI demonstrates its advanced engineering through 4MOTION® all-wheel drive. It boasts nappa leather appointed seating with front and rear heated seats as well as bi-xenon headlights with dynamic and static cornering lights. Unique 18" Interlagos alloy wheels are standard. The supreme V6 FSI delivers an engaging drive from its 3.6 litre direct injection V6 petrol engine. Producing 220kW of power and 350Nm of torque, it delivers astounding power and immense torque. The V6 FSI features a 6-speed Direct Shift Gearbox (DSG) as standard. Safety features include ABS with Brake Assist, Electronic Stabilisation Program (ESP), and eight airbags.

4MOTION® All-Wheel Drive.

The Passat CC V6 FSI features the 4MOTION® all-wheel drive system. With variable torque distribution to all four wheels, 4MOTION® provides the ultimate in enhanced road safety and superior handling. This innovative Volkswagen technology provides the best possible traction at all road speeds and conditions, regardless of the weather. The system uses an electronic Haldex clutch that responds to traction losses at the front and rear axles, and directs torque to the axle with the best traction.



Attractively styled 18" Interlagos Alloy wheels are standard for the V6 FSI.



Optional Equipment.

Lane Assist ○

If you accidentally drift out of your lane, the Lane Assist system instantly steers the vehicle back on course. If the maximum action available is not enough to stay in lane or if the speed falls below 65km/h, Lane Assist warns the driver with a vibration of the steering wheel.

If the driver takes their hands completely off the wheel, the system makes a sound and displays a 'takeover request' message. If required, Lane Assist can be overruled by the driver by softly steering against it. Lane Assist does not react when indicators are on. The driver is completely responsible for their speed and distance to other vehicles when the Lane Assist system is operating.

19" Lugano Alloy Wheels ○

Attractively styled 19" Lugano alloy wheels are optional to add a more powerful stance to your Passat CC.

Adaptive Cruise Control (ACC) with Front Assist. ○

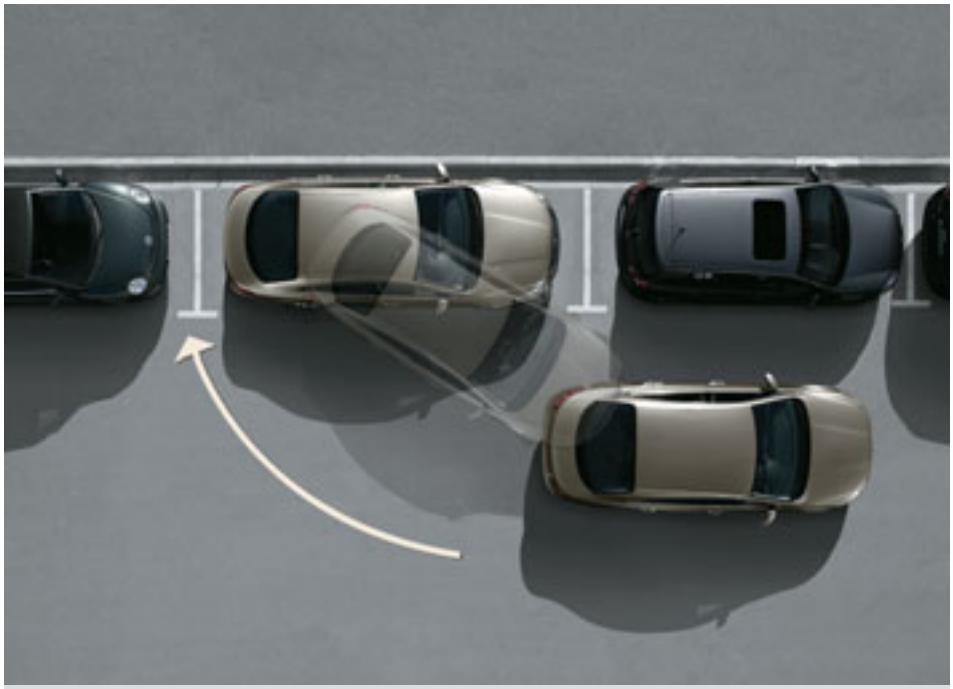
When approaching a slower moving vehicle, Adaptive Cruise Control (ACC) brakes your car to the same speed as the vehicle in front, maintaining the pre-selected distance. When a vehicle pulls into your lane in front of you or slows down, your vehicle is automatically decelerated. If reducing the engine torque doesn't decelerate the vehicle sufficiently, it can be braked to a standstill. Alternatively, if the vehicle ahead moves out of your lane, the Passat CC then accelerates up to the preset desired speed.

Front Assist uses a radar sensor to detect when your distance to the car in front becomes critical. It also helps to reduce the risk of a rear-end collision. Front Assist warns of a dangerous situation via a visual instrument panel warning plus an alert sound. Incase you don't react, Brake Assist activates a brief braking jolt to draw your attention to the risk of a collision.

Panoramic Glass Roof With Electric Rear Window Sunblind. ○

The panoramic electric tilt adjustable glass roof complete with sunblind helps you embrace the outside world. The electrically operated rear window sunblind is further evidence of Volkswagen's attention to detail, assisting a safe and comfortable driving experience.

○ Optional extras.



Park Assist 2 ○

Park Assist 2 makes parking problems a thing of the past. It's a system that uses sensors mounted on the front, rear and sides of the vehicle to automatically let you know if a parking space is the right fit. Ideal for both parallel parking and 90 degree parking (like those in shopping centres). All you do is control the speed, and the car steers and manoeuvres for a perfect park every time.

Active Climate Control Front Seats ○

Active Climate Control seats will ensure you keep cool during hot summer months and warm during winter's colder months. The seat base and back rest are ventilated by fans fitted to the interior of the seat, which circulate air through perforations in the upholstery. Optional Active Climate Control front seats are combined with standard heated seats and are adjustable in 3 speeds.

DYNAUDIO 600W Premium Audio System ○

The DYNAUDIO premium audio system incorporates a 10 channel digital amplifier delivering 600 watts through 10 high performance speakers tailored precisely to the Passat CC's acoustic environment. A perfectly refined ambience evenly distributed throughout the Passat CC, now that's exciting.

RNS510 Satellite Navigation System. ○

The RNS510 system has a user-friendly touch sensitive screen with a high resolution display that shows maps and video. This unique system calculates your travel route with incredible speed. It also features sophisticated voice recognition technology for increased convenience. With a generous 30GB hard drive and built-in DVD drive, your music library and navigation data is always at your fingertips. Your favourite music can also be accessed via an AUX-IN multimedia socket or an MP3 compatible SD memory card slot.

○ Optional extras.

Volkswagen Genuine Accessories.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Passat CC in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Passat CC, visit your local Volkswagen Dealer.

Fuel consumption**		
Combined, L/100km	5.7	9.7
Urban, L/100km	6.8	12.8
Extra Urban, L/100km	5.1	7.8
CO_2 emission, g/km	150	227
Fuel tank capacity, litres	68	68

^ Emission level according to European Regulation (EC) No. 715/2007 and Regulation (EC) No. 692/2008.
* The Start/Stop system is designed to reduce fuel consumption and CO2 emissions. It achieves this by automatically switching off the engine while the vehicle is stationary and then starting it again automatically when the driver wants to drive off. There are certain operating conditions where the Start/Stop system is deactivated (e.g. during engine warm-up), please refer to the owner's manual for full operating information.
# Please note performance figures are sourced from overseas data where equipment levels by model variant may vary.
** Fuel consumption figures according to Australian Design Rule (ADR) 81/02.
The driving style, road and traffic conditions, environmental influences, fitment of accessories and vehicle condition can in practice lead to consumption figures which may differ from those calculated with these standards.

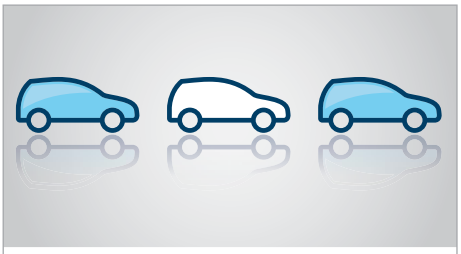
Fuel Saving Tips.

We can all Think Blue.

At Volkswagen, we aim to produce the most fuel efficient, environmentally sustainable vehicles possible. The good news is – we can all do our little bit to 'Think Blue'.

Below, we have summarised the best tips for how you can drive more responsibly and reduce fuel consumption even further. It's not just your wallet that will benefit from these tips, but the environment too. Its practical benefits go far beyond just saving money and reducing emissions. Here are nine tips on how to drive more efficiently.

Be aware and save fuel. Think Blue.

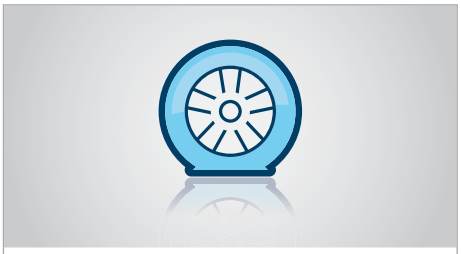


01. Take it easy and save
Drive the modern way and think ahead.
Drive smoothly and anticipate hazards. Hard braking and acceleration, sudden lane changes and unpredictable behaviour is fuel-inefficient.

02. Change up early and fill up later
Drive in the highest gear possible.
Use a higher gear with a manual transmission. Low revs take far less energy. With an automatic, reduce acceleration and avoid a kick down.

03. Just let it roll
Use overrun fuel cutoff.
With the right driving techniques, you can really save. Whilst in gear, coast down hills or towards traffic lights to reduce feeding fuel to your engine.

04. Comfort high, fuel consumption low
Use auxiliary equipment in moderation.
Check the equipment you're using – if you don't need it, consider turning it off. De-misters, sound systems and air conditioning all use energy.



05. Savings are in the air
Check your tyre pressures.
Check your tyre pressures to cut fuel consumption. Under-inflated tyres force your car to burn more fuel. Tyres in good order will help you save fuel.

06. A warm engine – a cool way to save
Avoid short trips.
Plan to minimise the number of trips you need to make. Frequent short trips mean higher fuel consumption as cold engines run less efficiently.

07. Well-oiled for impressive savings
Use Volkswagen approved engine oils.
A well-lubricated engine produces less emissions especially when the weather is cold or the trip is short. Change your oil at regular intervals.

08. Keep it sleek
Cut aerodynamic drag.
Remember to remove roof racks, bike racks or roof boxes off your car when they're not in use. Keep windows up and sunroofs closed to reduce drag.

09. Lightly does it
Avoid unnecessary weight.
Every kilogram you load into your car takes energy to move – energy that will be supplied by burning fuel. The lighter you drive, the more you save.

Glossary.

4MOTION®
An all-wheel-drive system that provides the best possible traction at all road speeds, in all weather and road conditions. An electronic Haldex clutch responds to traction losses at the front and rear axles and directs torque to the axle with the best traction.

Adaptive Chassis Control
The electrically controlled dampers of adaptive chassis control constantly adjust to the road conditions, the driving situation and driver's requirements. Using a button located on the centre console, the driver selects between three damper settings – NORMAL, COMFORT and SPORT.

Starting from the normal setting, the driver can change the basic character of the car towards sporty or more comfort-oriented driving. In SPORT and COMFORT settings, the corresponding name is illuminated in the button. In NORMAL setting, only the shock absorber symbol is illuminated. In all settings, the adaptive chassis control adjusts the damping to the particular driving situation (up till one thousand times per second) which means it offers an optimum level of driving comfort and enjoyment at all times. In addition, in the SPORT setting the steering feel is also adapted. Particularly on windy roads and poor surfaces, using adaptive chassis control offers sporty and yet comfortable driving.

Adaptive Cruise Control (ACC)*
Adaptive Cruise Control (ACC) is an extension of the conventional cruise control system with advanced capabilities based on a radar sensor. When ACC is activated, the vehicle automatically brakes and accelerates in a speed range set by the driver.

If the Passat CC approaches a slower vehicle, the ACC brakes the car to the same speed and maintains the pre-selected distance. Even when a vehicle pulls into the same lane in front of you or slows, your vehicle is automatically decelerated to the pre-selected distance. If the vehicle ahead moves out of your lane, the Passat CC then accelerates up to the preset desired speed.

Deceleration of the vehicle may take place via intervention in the engine management system. If deceleration via engine torque is not sufficient, brake intervention takes place, braking the vehicle to a standstill if the traffic situation necessitates. ACC can be reactivated automatically by tapping the accelerator pedal.

Adaptive Cruise Control (ACC) cannot replace the driver's assertiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. The ACC system does not react to stationary obstacles and oncoming vehicles. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain.

Anti-lock Braking System (ABS)
When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)
ASR improves driving and steering characteristics by preventing the driven wheels from spinning under acceleration. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system automatically reduces engine torque. ASR is a switchable traction control system.

Auto Hold Function
As soon as the vehicle comes to a complete stop, the ABS hydraulic unit stores the vehicles final braking pressure. So even when you take your foot off the brake pedal, all four wheels brakes remain applied, providing increased comfort in stationary traffic. This function is released automatically when you drive off again.

Brake Assist
During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Direct Shift Gearbox (DSG)
DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 wet multi-plate clutches. The benefit of 2 gear sets and 2 multi-plate wet clutches is that one gear set and clutch is engaged driving the vehicle with the second clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

Electronic Brake-pressure Distribution (EBD)
Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)
EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Glossary cont.

Electronic Stabilisation Program (ESP)

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Front Assist with City Emergency Brake (City EB) function*

The Front Assist ambient traffic monitoring system uses a radar sensor to detect critical distance situations and thus help to shorten the braking distance, reducing the risk of a rear-end collision.

The traffic ahead is monitored constantly by the radar at the front. If a vehicle is detected ahead of you in the lane, the distance and the speed relative to it are calculated. If the gap is closing too fast, Front Assist initially warns the driver by means of an audible as well as a visual signal. At the same time, the brake pads are brought into contact with the brake discs and the sensitivity of the Brake Assist is increased. This primes the braking system for a possible emergency stop.

If the situation escalates, the City EB function provides automatic braking and/or boosting of the driver's braking force up to maximum braking.

Front Assist with City EB cannot replace the driver's assertiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles.

Lane Assist*

Lane Assist is a lane departure warning system that is designed to help reduce the likelihood of the vehicle leaving the road or crossing into on oncoming lane and therefore the risk of accident as a result of driver distraction or a lapse in concentration.

The Lane Assist system monitors the road ahead with the aid of a camera (located near the interior rear-view mirror) which recognises lane markings and evaluates the position of the vehicle. If the vehicle starts to leave the lane, the Lane Assist system takes corrective steering action. If this is not sufficient the driver is warned about the situation by a steering vibration and is asked to take over the steering. Additionally, if no active steering movements by the driver are recognised for longer than approximately 8 seconds, a message will appear in the Multi-Function Display (MFD Plus) in conjunction with a warning tone. The corrective steering function can be overridden by the driver at any time and the system does not react if the turn indicator is set before crossing a lane marking.

Lane Assist cannot replace the driver's assertiveness. The driver is still legally responsible for the vehicle and therefore staying in the lane at all times. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system. The Lane Assist system does not activate at a vehicle speed of less than 65km/h.

Park Assist*

Park Assist 2 actively helps the driver when reversing into 90º parking bays, as well as reversing into and driving out of parallel parking spaces. The system works by using sensors mounted either side of the front and rear bumpers together with parking distance sensors front and rear. To park, the driver simply presses the Park Assist button to select the type of parking manoeuvre and uses the appropriate indicator as the car slowly passes the potential parking space. Sensors scan the size of the parking space as the car is driven past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects reverse and lets go of the steering wheel.

Park Assist will alert the driver of the intended path and subsequently the appearance of obstacles in the Multi-Function Display, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course, if necessary with several moves. The driver can however take over the control of the steering at any time and end the automatic parking procedure.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

*Optional equipment

Owning a Volkswagen.

Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year unlimited kilometers manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen dealer.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen New Vehicle Extended Warranty*

To give you added peace of mind and the assurance of added security, you have the option to extend the warranty period to suit your ownership cycle. If your Volkswagen is still covered by its New Vehicle Warranty, we can offer you a 36 month/60,000km extension on the original warranty period already existing with your Volkswagen manufacturers Warranty. You then have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles warranty period, please consult your local Volkswagen dealer, refer to your owner's handbook or visit volkswagen.com.au.

* Volkswagen New Vehicle Extended Warranty product is provided by Allianz Australia Insurance Limited (Allianz) ABN 15 000 122 850, AFSL Licence No. 234708. In arranging this cover, Volkswagen Group Australia Pty Ltd, ABN 14 093 117 876 and the authorised dealers act as agents of Allianz and not as your agent. Limits apply to the benefits you can claim. For full terms and conditions of cover, please refer to the relevant Volkswagen New Vehicle Extended Warranty policy document, available to you from your Volkswagen authorised motor dealer.

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre is able to undertakes work in accordance to factory specified guidelines and maintenance schedules.

Volkswagen Genuine Accessories®

Volkswagen Genuine Accessories® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Accessories®. Volkswagen Authorised Dealers offer a 3-years/ unlimited kilometres warranty on genuine accessories if fitted prior to vehicle purchase, or a 2-years/unlimited kilometres warranty if fitted after purchase.

Volkswagen Finance

Whether you are buying, borrowing or leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are designed to suit your individual requirements and budgeting needs with fast approval times.

Speak to your participating local Volkswagen Dealer today for the best financial solution and ultimate insurance protection for your vehicle or visit volkswagenfinance.com.au.

VOLKSWAGEN FINANCE

Think Blue.
Creating a sustainable future together.

Volkswagen is committed to sustainability now and in the future, for us this means taking responsibility for the environment by getting involved in initiatives that contribute to a sustainable future through our products and behaviour.

We call this way of thinking, Think Blue.

Volkswagen aims to become the leading automotive manufacturer for the environment and economy, making efficient and sustainable vehicles available to everyone. We want to inspire and motivate people to get involved in ecological sustainability, on the road and everywhere else.
